

What is the CLUB?

The CLUB's Vision & Mission:

Our vision is to create a future where the appointment of a woman CEO in Silicon Valley is not front page news. Our purpose is to help create that future building a leadership pipeline by providing an environment and the tools to accelerate the development of women business leaders.

The CLUB is a leadership incubator that cultivates and grooms the next generation of women business leaders. And we do that in a few different ways, including:

Professional Development: It all starts with knowledge and skills. The CLUB brings in experts from various fields to educate members on trending and essential topics necessary for leadership.

Forums: We connect members with other women in and outside of their profession with similar levels of experience, and with whom they can meet regularly and share ideas about issues they collectively face.

Networking Events: Having connections and a strong professional network are vital to leadership development. Successful women often feel isolated, and potentially dis-empowered. By connecting women, we mobilize and create opportunities. The CLUB is here to create and foster those connections by hosting regular events such as cocktail hours, dinners, panel discussions, and more.

As a CLUB member, we ask the following of our members:

- Your active participation
- Your willingness to help other members
- Your openness to asking for help
- Your help inspiring other successful women to become business leaders

We encourage employer sponsored memberships. [Click here](#) to see how to become a corporate sponsor.

We also welcome individual members, upon approval of our membership committee.
